

The FCC and the NAB need to shut the hell up! I am so sick of how they feel they can manipulate the public and decide what they think we should or should not listen to. What happened to free speech? Or is that just a load of garbage? and if it is, is the entire Constitution garbage as well? We subscribe to XM Radio, which means we pay hard earned momey to listen to our choice of stations. I honestly believe our tax money goes to public radio as well and that government agencies should not get involved with what is broadcast. I know I speak for many when I say I like the idea of FREEDOM. When are we going to get it is another thing. With agencies like the FCC and NAB, we will NEVER see it.
